

# Agile Projects | Project Management Standards

## “Why is project management so bad in our company?”

Many companies that have implemented a project management standard do not achieve the expected outcome. We can help you to successfully identify and implement the right processes and methods in project management.

Which project management standard or which project management process is the right one for the projects, for the culture and the organization of your company?

Being an independent consulting company, we identify the right methods or standards together with you. We support you during their introduction and demonstrate the increase in efficiency.

We support you using these project management standards

Scrum  
 PMMM  
 ISO 21500  
 ISO 10006  
 HERMES  
 ICB  
 PMBOK IEC 62198  
 V-Modell XT  
 DIN 69909  
 DIN 69901  
 PRINCE2

## No success in spite of project management standards?

We know the different standards, their pre-requisites, advantages, and disadvantages. They determine the success or failure of a selected method.
